

CONSTELLATION STEERING

CONSTELLATION 400

Constellation 400 Pedestal

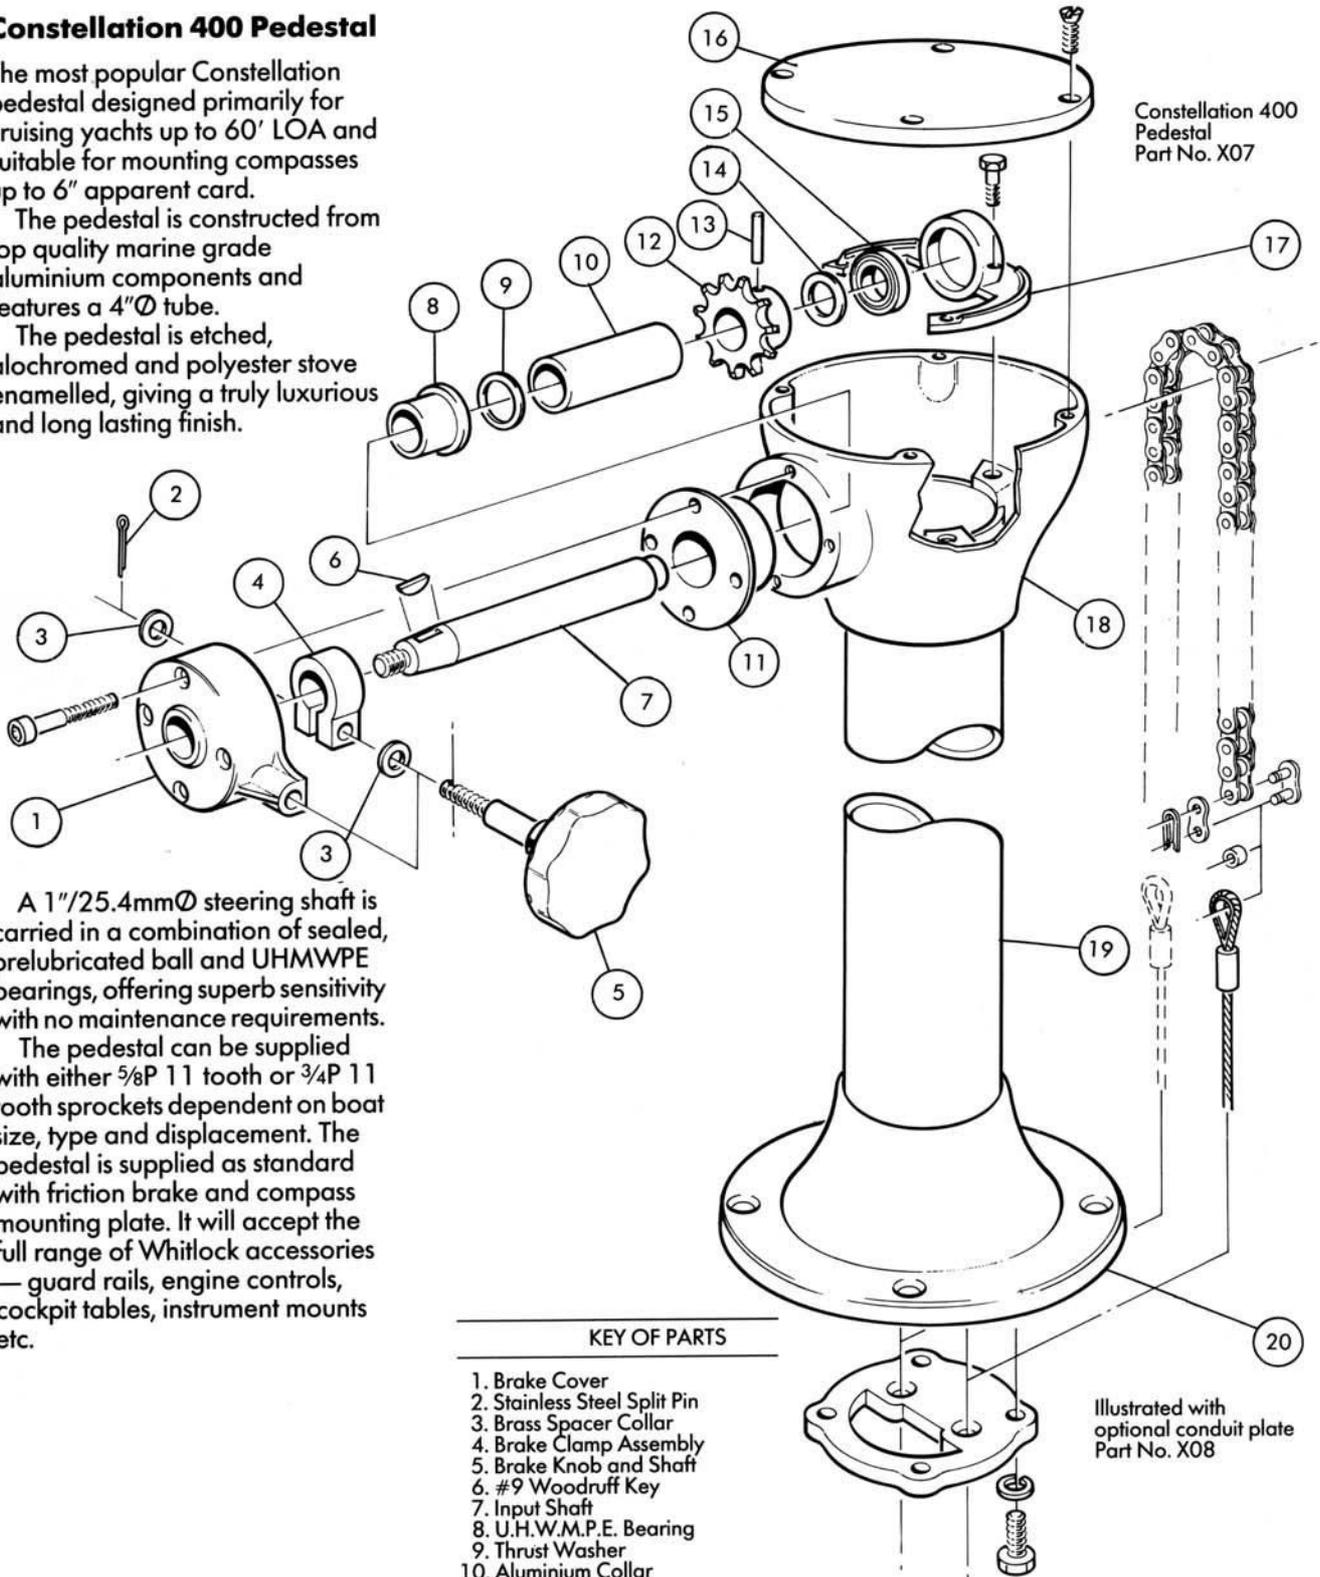

The most popular Constellation pedestal designed primarily for cruising yachts up to 60' LOA and suitable for mounting compasses up to 6" apparent card.

The pedestal is constructed from top quality marine grade aluminium components and features a 4"Ø tube.

The pedestal is etched, alochromed and polyester stove enamelled, giving a truly luxurious and long lasting finish.

A 1"/25.4mmØ steering shaft is carried in a combination of sealed, prelubricated ball and UHMWPE bearings, offering superb sensitivity with no maintenance requirements.

The pedestal can be supplied with either 5/8P 11 tooth or 3/4P 11 tooth sprockets dependent on boat size, type and displacement. The pedestal is supplied as standard with friction brake and compass mounting plate. It will accept the full range of Whitlock accessories — guard rails, engine controls, cockpit tables, instrument mounts etc.

KEY OF PARTS

1. Brake Cover
2. Stainless Steel Split Pin
3. Brass Spacer Collar
4. Brake Clamp Assembly
5. Brake Knob and Shaft
6. #9 Woodruff Key
7. Input Shaft
8. U.H.W.M.P.E. Bearing
